SOFT SKILLS

Motivation

I love expending time working on my projects and continue learning by myself.

Leadership

I would like to become a leader, not a boss. Thus, even after adversities, I tried to be that leader in order to guide, help and reach the goal with the rest of the team.

Fast learner

It's not difficult for me to start learning a new technology or continue improving my abilities, which means that I never stop learning.

TECHNOLOGIES

JavaScript

Node.js

Linux enthusiast

Git

MongoDB

Express.js

HTML5

CSS

Bootstrap

Python

C++

Java

Microsoft 365 Office / Copilot

LANGUAGES

English - Professional Proficiency

Tamil - Elementary Proficiency

Kannada - Elementary Proficiency

PROFILE

I am a passionate Computer Applications student loving increasing my knowledge and never stop learning! I love to build web apps and implement automation in development and operations. I'm passionate about pursuing a career at the intersection of DevOps and cloud computing. I aim to work for a technology-driven company where I can leverage my skills to design and implement scalable, reliable, and automated infrastructure solutions.
